

TIE UP ON DRUMHELLER CALGARY HIGHWAY

A. D. Schmidt who has been hauling coal from Drumheller and Carleton Place, reports that the roads were badly drifted last Thursday, holding up traffic even on the Calgary-Drumheller highway. They were returning to Didsbury from Drumheller on this highway and south of Carleton near the Biebrich service station the roads were so badly drifted that they could not proceed. About 25 trucks lined up at this spot, some loaded with cattle, which had to be unloaded and taken to a nearby farmer.

Finally the snow now came out from Calgary and cleared out the road and they were able to get through. However, by the time the road was cleared about a mile long stretch of cars and trucks were lined up at this particular place on the highway.

Dr. Miner and assistants from the Rosebud Health District visited the local school last week and gave the pupils a check over.

THE DIDSBURY PIONEER

VOLUME 43 NUMBER 7

DIDSBURY, ALBERTA, THURSDAY, FEBRUARY 14, 1946

\$2.00 A YEAR: 5c A COPY

C. H. CLEMENS, STORE OWNER AT BERGEN, BURIED SATURDAY

A merchant of Bergen, Alta., for the past three years, George H. Clemens, 47, died Wednesday, February 8 in a Calgary hospital after a long illness.

Mr. Clemens was born at Rochester, N.Y., and moved to the Carstairs district in 1901. From 1918 until 1929 he lived in Didsbury, and was later employed by Motor Car Supply Co. in Edmonton and Calgary for 13 years. He also spent a year at Dawson Creek.

Surviving are his widow, Ester, in Bergen; one daughter, Mrs. R.V. Paul, Edmonton; his father, M. B. Clemens, Calgary; three sisters, Mrs. J.W. Halton, Calgary; Mrs. M. Uterback, Chelan, Wash.; and Mrs. Lois Battelle, Kimberley, B.C. Also a brother, E.B. Clemens, Edmonton.

Funeral services were held Saturday at 2:30 p.m. in the Bergen church with Rev. T.M. Dobson of South Calgary United Church officiating. Interment was made in the family plot in the Bergen cemetery, with Fisher's Funeral Home in charge of arrangements.

The grave casket was almost smothered in lovely flowers. Even the wall was hung with lovely wreaths sent by sympathetic friends. Rev. men were able to enter the church and the Rev. A. Habermehl paid tribute to Mr. Clemens as a friend, business man, and loyal citizen, beloved and highly esteemed by all.

Rev. Dobson of South Calgary United Church, brought the message of consolation from Hebrews 11.

Mr. Thompson sang "The Old Rugged Cross".

DIDSBURY W.D. WEDS—HANDLED AIR NEWS

The good humored "W.D." responsible for facilitating the distribution of R.C.A.F. news and pictures to newspapers throughout Canada has been married and received her discharge from the service, it was announced in Toronto.

She is Fitt Set. Ruby Jackson of Didsbury, Alta., senior N.C.O. at air force public relations, and her husband is Sgt. Harold Wilson of Ottawa, correspondent of the army newspaper Maple Leaf at defence headquarters.

The only hockey game that Westcott had on schedule for the past week was the game with Garfield at the Didsbury rink on Sunday, but the weather man interfered and the Garfield players were unable to get through the heavily drifted roads, so this game will have to be played at a later date.

We also learned that the playing coach of the Garfield team, Mr. "Slim" Dore has been a patient in the Didsbury hospital the last few days. We extend to Mr. Dore our sincere wishes for a speedy recovery.

Among those who were Calgary visitors over the week end were Mrs. E. Tressler, the Westcott teacher, and Mr. Allen Korschelt.

Notes from the East

We hear that Mr. and Mrs. Floyd Altman has a son. Congratulations!

Ray Dowell spent the week end with his mother. Ray made 75.5% in his examinations and likes his studies at the Technical school very much.

Bert Viney has returned from overseas and spent a few days with his folks at Sunnyside. Welcome home, Bert.

The Lone Pine W.I. is to meet at the home of Fred Metz this Thursday, weather permitting.

Mr. and Mrs. Coates spent Thursday afternoon visiting with the latter's parents, Mr. and Mrs. W. D. Bennett of Orléans.

We are pleased to know that Mrs. B. Woods was well enough to be up on Wednesday and we do hope it won't be long until she has completely recovered from her accident, when she was kicked by a horse.

LADY CURLERS WIN PRIZES AT CARSTAIRS BONSPIEL

Two rinks from Didsbury entered the one-day ladies' bonspiel at Carstairs last Wednesday, February 8th, and were successful in bringing to town the two first prizes.

Joyce Morgan's rink, with Mrs. Glen Fulkner, Mrs. Esler and Mrs. Ross Youngs never lost a game in the 'spiel, and won the major event.

Mrs. Platz, Mrs. Topley, Mrs. M. Wood and Mrs. Krebs comprised the other rink which won the first prize in the secondary event.

Ten rinks were entered in the play.

MRS. RICHARD HAENER DIES IN LOCAL HOSPITAL

Mrs. Ella Haener, 57, of Elkton district, died Tuesday, February 5 in the Didsbury hospital after a lingering illness.

Born in Hamburg, Germany, Mrs. Haener came to Alberta 20 years ago. Together with her husband, she operated the grocery store at Elkton for many years.

Surviving are her husband, Richard, two brothers and two sisters in Germany.

Funeral services were held at Knox United Church, Didsbury, on Thursday at 2 p.m. with the Rev. D. White officiating and interment followed in the Didsbury cemetery with W. McFarquhar of Didsbury Funeral Home in charge of arrangements.

Burial services were: Chas. Bert, Geo. Bert, Dan Russell, Mark Remy, Chris. Radke.

WESTCOTT NEWS NOTES

Mrs. O.T. Swanby accompanied her son Tom and Le Roy Benson to the Boy Scout Picnic at Calgary last Friday evening.

Miss Glueck, Luft, Cremona, and Miss Lucie Paule of Elkton were visitors at the J. Stevenson and I. Goettien homes over the week end.

Besides having had blocked roads the most of the time this winter the telephone wasn't working properly last week end, so even the privilege of a friendly chat with the neighbors seemed out of the question for a time. It was then we realized how pioneering must have been, with no telephone, no radios, and no roads. Boy, what a life that must have been!

Miss Delores Goettien has been spending the last few days at her home at Westcott.

The only hockey game that Westcott had on schedule for the past week was the game with Garfield at the Didsbury rink on Sunday, but the weather man interfered and the Garfield players were unable to get through the heavily drifted roads, so this game will have to be played at a later date.

We also learned that the playing coach of the Garfield team, Mr. "Slim" Dore has been a patient in the Didsbury hospital the last few days. We extend to Mr. Dore our sincere wishes for a speedy recovery.

Among those who were Calgary visitors over the week end were Mrs. E. Tressler, the Westcott teacher, and Mr. Allen Korschelt.

HAROLD E. OKE AND LYNN HUNSPERGER ELECTED TO DIDSBURY SCHOOL BOARD

At the school trustee elections in Didsbury Monday, Harold E. Oke, one of the retiring trustees, and Lynn Hunsperger, a new aspirant for the position, were elected to the Board of Trustees of the Didsbury School District No. 652 for the years 1946 and 1947.

Following are the results of the ballot:

Oke, Harold E. 99
Hunsperger, Lynn 75
Knuffman, Frank 65

The 1946 school board will therefore consist of the following trustees: A.R. Kendrick, Geo. Law, T. Morris, Harold T. Oke and Lynn Hunsperger.

BURNSIDE NEWS NOTES

Around midnight last Wednesday Mr. and Mrs. Viney who left this neighborhood to reside in Didsbury about three years ago, were awakened by someone knocking at their door, and upon investigating they were confronted with their son Bert Viney, who had just returned from overseas. Bert joined up in '41 and went overseas in '42, was at the landing on the beaches in Normandy and from there "carried on" until his turn came to come home.

He was very popular in this neighborhood and a warm welcome home is extended to him.

Mrs. Bartlett, another ex-resident of Burnside, also had the good fortune to receive two of her sons out of three, back on the last boat load, and the other is expected to follow shortly. Our congratulations to Mrs. Bartlett, who is a widow, and to her sons.

Chas. Kohut has bought out Jack Belton and it is rumored the latter will have a sale at the end of March.

Mr. and Mrs. R. McCulloch spent Sunday with Mr. and Mrs. Mike Nielsen.

Enoc Dawson became so ill that he had to be removed to the local hospital. We wish him a speedy recovery and an early return to his position as manager of the Neapolis store.

Joe and Kesh S. visited with Mr. and Mrs. Joe Clarke on Sunday.

In suite of severe weather and bad roads four Weber hit out early Monday morning with a truck load of stock, city bound.

BERGEN NEWS NOTES

James Davidson, who was in the royal service in Italy, is glad to be home.

Trygve Haug has been in hospital but is now on the mend and home.

Wesley Haug came home but left his wife overseas until June.

Mrs. Selma Clarke came home on Tuesday with a new daughter.

Rev. A. Habermehl returned from Cremona to hold a funeral service for Harold Oke.

Mrs. John Molsness, Mrs. Thora Molsness and Mrs. Lorenza Gram were here to attend the funeral.

The Bergen friends of Mrs. Clemens extended to her their sincere sympathy in her bereavement.

WESTERDALE NOTES

The Westerdale community hall has been greatly improved by sealing it with three-ply wallboard. The wiring of the hall for electric lights is expected to commence shortly.

The Westerdale Young People's Club plan to hold a novelty dance on February 22nd.

The Springdale district held a dance in the Westerdale hall February 8.

The Westerdale school children are having a Valentine party and Weiner roast at the school Friday, February 15.

Mrs. K. A. Blatchford, who has been spending the past six weeks at the Ranton home, returned last Friday to her home in Edmonton.

DIDSBURY DETACHMENT, CALGARY REG'T (TANK) TO PARADE WED., FEBRUARY 20

Didsbury Detachment, Calgary Regiment (Tank) will parade at the Didsbury public school on Wednesday, February 20, at 2:00 hours. Civilian shoes.

The detachment will also parade at the Arena, Orléans, on Sunday, Feb. 24th at 12:00 hours. Dress—battle dress, berets, anklets and web belt. Trucks leave Didsbury at 11:00 hrs. This is a muster parade—no leaves granted.

CAR RUNS INTO TEAM NEAR GOLE'S FEED MILL

An accident occurred last Friday night about 10 p.m. when Dr. Epp ran into a team of horses owned by Carl Nelson.

Dr. Epp was taking to his office for medical aid Stewart Tighe, goal tender for the Neapolis hockey team, who was injured at the rink and apparently did not see the team and sleigh opposite Gole's Cleaning and Grinding Mill, and ran into the horses. The wagon tongue went through the windshield of the car and sleigh opposite Gole's Cleaning and Grinding Mill, and ran into the horses. The wagon tongue went through the windshield of the car and sleigh opposite Gole's Cleaning and Grinding Mill, and ran into the horses. The wagon tongue went through the windshield of the car and sleigh opposite Gole's Cleaning and Grinding Mill, and ran into the horses.

A veterinary surgeon from Orléans checked over the animals and while no bones were broken, one of the horses was badly injured in the chest.

Fortunately neither Dr. Epp nor Stewart Tighe in the car, and Mr. Nelson in the sleigh, were seriously injured, although the Doctor's car will need some repairs to again get in shape.

ANNUAL MEETING OF OLDS LIVESTOCK BREEDING CLUB

The annual meeting of the Olds Livestock Breeding Club Ltd. will be held in the Dormitory of the School of Agriculture on Tuesday, February 19, at 1:30 p.m.

This Club has been operating for the past two years in the area between Carleton Place and the south and northwest on the north and is the first club of its kind in Western Canada.

All members and those interested in Artificial Breeding as a method of livestock improvement are urged to attend.

Entomologists Have Conducted A Successful Battle Against The Infestation Of Grain Insects

THE farm wife who is troubled with ants in her pantry or beetles in her flour barrel is not alone in having insect trouble. Somewhere or later everyone who stores food is faced with the problem of protecting it from insects. Naturally the biggest problem falls to those who store the largest quantity of food such as the grain elevator operators who store millions of bushels of grain every year.

Few people viewing a grain elevator with its clean walls of thick concrete think of it as being subject to the invasion of insects, yet weevils, beetles, and moths are sometimes found at work within its bins eating ruinously and multiplying as they eat. Into grain elevators in certain parts of the Dominion, the Indian meal moth finds its way and lays its eggs in the bins of golden wheat. The eggs hatch and the larvae select their favourite food, the germ of the grain which they greedily scoop out. The larvae of another pest, the rusted grain beetle, also burrows into the germ. The immature stage of the granary weevil is not particularly as it hollows out the entire kernel, reducing it to a mere shell.

These troubles developed when Canada was at war and it was necessary to supply Great Britain with as much food as possible, when guns and tanks and planes and men competed with food for space on crowded ships. In normal times, the expert entomologists found little opportunity to establish themselves in Canada's fast moving grain stores, but with the outbreak of war huge stocks of grain piled up, affording an unusual opportunity for the insect saboteurs.

During the past year, H. E. Gray of the Division of Entomology, Dominion Department of Agriculture, and E. N. Smallman of the Board of Grain Commissioners, have been directing the battle against insects entered in stored grain. So successfully has been their campaign that the insects are now in retreat; in 1942, insect pests were found in a large percentage of the bins examined by these government officials; by 1945, the infestation in the same elevators had been reduced by 73 per cent., and in many of the elevators it was practically impossible to find any living insects.

The entomologists began their campaign by recommending methods of insect control and showing the elevator owners and operators how to apply these methods. Their work was effective, but only to a degree. These two entomologists in the spring of 1944 invited grain elevator representatives to attend a short course in insect control which was held at Montreal, Toronto, Fort William, and Vancouver. For four days at each of these centres a total of 260 representatives of 82 different grain storage organizations met on a casual dinner, listened to lectures, examined live and dead grain insects, and asked hundreds of questions.

When the course was over, practically every elevator company had assigned one of its staff the task of keeping its premises in such clean condition that insects would find it difficult to stay there. This activity has been carried out under the direction of the binman or elevator foreman who is responsible for the inspection and cleaning of the bins and carrying out insect control and other sanitary measures. If severe infestation should develop, fumigants recommended by the government entomologists are used. Several materials are available which are entirely harmless to humans and which are applied at the top of the bins and penetrate to the bottom, killing the insects as they go. If the infestation is on the surface, in the case of the Indian meal moth, the insects are destroyed by a fog-like spray of ten per cent. pyrethrum in a high grade oil which, on evaporation, leaves no trace on the grain. The knowledge of their value and the consistent use of these modern fumigants and sprays, combined with good housekeeping practice, have largely eliminated the hazard of insect infestation. This work will be continued for the protection of Canadian wheat standards, to the mutual advantage of grain producers, handlers, and consumers.

SIMPLE BUT SINCERE

One of the greatest tributes ever paid to Jean de Bank, the "Prince of Tenors", came at the end of a procession of his colleagues to his dressing room at the Metropolitan Opera House, New York, to offer their congratulations upon his successful reappearance after a year's absence through illness.

Enter the electrician, who, thinking of a "herney hand of foil" into that of de Bank's, exclaimed:

"Jean, you done fine!"

SCATTER SEEDS OF KINDNESS

Do you wish the world were happy?

Then remember day by day

Just to scatter seeds of kindness

As you pass along the way,

For the pleasure of the many.

May be oftener traced to one,

As the hand that plants an acorn

Shelters armies from the sun.

Largest of its kind, the white heron

has a wing spread of nearly seven feet.

Record Flight

British Aircraft Sets A New Atlantic Speed Record

The second England two-man flight by the British Lancaster has marked the opening of Heathrow, London's huge new airport. The Lancaster, "Star Light," left Heathrow at noon on January 1 and arrived at Rio at 5:18 p.m. the following day, thus establishing a first in these scientific terms which might be a symbol of our country's determination to regain its place in the markets of the world and to use the air as a means of cultivating good relations with other countries.

This flight is one of the first of a series of trial flights planned by British South American Airways to give pilots experience of the route before the new, swift British Air Service between England and South America goes into regular operation.

The service will operate from Heathrow, which will be London's main terminal airport for trans-Atlantic traffic. This airport, built at a cost of some twenty million pounds, will when completed (next June) be the finest and safest airport in the world. The three runways—8,000, 6,000 and 4,000 feet long—are arranged in a triangular pattern and are 300 feet wide, providing landing facilities for the largest aircraft now contemplated.

The aircraft was piloted by Air Vice Marshal Bennett, pioneer of the Atlantic Ferry Service and founder of Bomber Command's Pathfinder Force.

Shortly before "Star Light" took off from England Lord Winter, Minister of Civil Aviation, wished the pilot good luck. "This plane with its beautiful name 'Star Light' is said to be a symbol of our country's determination to regain its place in the markets of the world and to use the air as a means of cultivating good relations with other countries."

"DREAM WAC" TO GET FILM TEST—"Dream" W.A.C., who was spied one day by a producer in Washington's Pentagon building, and conduct he hosted again for a month, is Maj. Jeanne Swann. New she will have screen test.

Solar Energy

Claim That The Sun Supplies Light And Heat By Atomic Energy

Atomic energy as revealed in the sun which lights our skies is the subject of rather a profound editorial in The Victoria Colonist. It gives one something to think about and is not in these scientific terms which might bewilder the average layman reader.

The Colonist points out that while the world revels in the "discovery" of atomic energy, the sun has been burning in it for more than four billion years and is wholly capable of conceiving. The light which makes our day and which takes an appreciable time to reach the earth, is itself the result of high temperatures, caused by a complicated process of disintegration.

Even while each of our children is to have one, he'll have to make one more after that.

"It really is an interesting hobby," Mr. Gerhart said. "I'm not an expert carrier by any means. There are hundreds more people with far more skilled hands than I have."

Mr. Gerhart said. "I'm not an expert carrier by any means. There are hundreds more people with far more skilled hands than I have."

Makes Violins

Minister In Alberta Government Has Interesting Hobby

Ben C. E. Gerhart is a busy man, with responsibilities as minister of two Alberta government departments—Trade and Industry and Municipal Affairs—but he still finds time to work at an unusual hobby. He makes violins.

Using tools like a jack-knife and hand-made chisels he fashioned an instrument—his first of wood specially imported from Europe, which surpassed in appearance and tone many violins displayed at high prices in music stores.

In an American music expert appraised Mr. Gerhart's first violin at \$500. He has been working on the second and if each of his children is to have one, he'll have to make one more after that.

"It really is an interesting hobby," Mr. Gerhart said. "I'm not an expert carrier by any means. There are hundreds more people with far more skilled hands than I have."

Report Reveals That Defensive Measures Were Prepared To Deal With Bacteriological Warfare

PLANS to counter possible bacteriological warfare occupied Canadian, British and American scientists at the same time they were developing the atomic bomb, a Washington War Department statement revealed. This confirmed reports circulated a few weeks ago when Prime Minister Mackenzie King, Prime Minister Attlee and President Truman were preparing their recommendation for United Nations control of atomic and other mass killing implements of war.

The report was prepared by George W. Merck and head of a Railway, N.J., chemical firm and consultant to the War Secretary on biological warfare.

It revealed that evidence indicated a definite idea in Japan that bacteriological warfare might be resorted to and that evidence existed to indicate the possibility of retaliation in the kind could not be disregarded in the event such agents were used against us.

In studying methods of defending man, animals and crops it was necessary also to investigate offensive methods and "it was equally clear that the possibility of retaliation in the kind could not be disregarded in the event such agents were used against us."

Methods and facilities were developed for the mass production of micro-organisms and their products.

But it was directed that no biological warfare agents should be produced in quantity without specific approval of the Secretary of War. In fact, no large stocks of these agents have ever been accumulated.

Expressing apprehension that would-be hostile countries could develop in secret the means of fighting with germs, the report said:

"It is important to note that, unlike the development of the atomic bomb and other secret weapons during the war, the development of agents for biological warfare is possible in many countries, large and small, without cost expenditures of money or the construction of huge production facilities. It is clear that the development of biological warfare could easily be accomplished in many countries, perhaps under the guise of legitimate medical or bacteriological research."

Whatever deliberations that take place concerning the implementation of a lasting peace in the world, the potentialities of biological warfare cannot safely be ignored."

A note by the war department, attached to the report, said that intelligence reports from Japan, received since Mr. Merck's report, showed that Japan had made "definite progress in biological warfare" in developments that began in 1926 and continued as late as 1945.

"Modifications of various weapons developed through research in their laboratories were field-tested at army proving grounds where these field experiments were also conducted in the use of bacteria for purposes of sabotage," said the department's note.

"These efforts were directed with energy and ingenuity. While defence progress was made, the Japanese had not at the time the war ended reached a point where they were in a position to use these offensive projects could have been placed in operational use."

"There is no evidence that the enemy ever resorted to this means of warfare."

As to the Nazis' work with germ warfare, the report by Mr. Merck said:

"In December, 1942, the chief of strategic services reported to the joint chiefs-of-staff that there were some indications that the Germans might be planning to use biological warfare agents. While the evidence that the Germans might use such agents was inconclusive, there was considerable concrete information available from work which had been carried on in the United States, the United Kingdom and Canada that attack by biological warfare agents was feasible."

During the last war Sir Ian Hamilton once went out of his way to review a Home Guard cavalry troop in England. All went well until a was in the crowd happened to recognize a horse that was used in the baker's morning delivery route.

He sang out "Baker!" Immediately the animal came to a dead stop. Nothing could budge it out of its tracks.

But then the funny-man's voice was heard again. "Nothing today, thank you!"

Instantly the house came to life and stepped briskly forward.

GOOD ADVICE

The Kitchener Record says it is fairly easy to become well off financially. Instead of buying on credit something you want, have enough money to pay cash for it and by then you probably won't want it.

J. G. SCHAEFFER, director of the Division of Sanitation, Saskatchewan Department of Public Health. In collaboration with the Division of Health Education, he is completing arrangements for food handlers schools, as part of a restaurant sanitation program.

Health Program

Schools For Food Handlers To Be Launched In Saskatchewan

"Many restaurants in Saskatchewan do not measure up to public health standards as to cleanliness, sanitation, protection of food, and service," J. G. Schaeffer, director of the Division of Sanitation, said.

Mr. Schaeffer spoke of the two-day schools for food handlers to be launched by the Department of Public Health and said that the courses would give both proprietors and employees an opportunity to improve conditions and methods of serving the public.

Exposure of foods and tableware to dirt and vermin, and improper washing methods are among the chief causes of public health problems in Saskatchewan, the sanitation director said. Some places do not use even hot water, and others wash dishes without washing powder or soap, he continued.

"Protection of the eating public requires sterilization of dishes, which is done ineffectively and effectively by means of triple sinks, one for washing the scraped dishes, a second for rinsing, the third for immersion in water heated at 170 degrees Fahrenheit," Mr. Schaeffer continued.

A Matter Of Taste

World's Best Dressed Women Are Never Laid As Such

The St. Louis Post-Dispatch says: "The intelligence that Mrs. Stanley Mortimer, the New York society woman, has retained her title as the world's best dressed finds us holding our breath."

"These efforts were directed with energy and ingenuity. While defence progress was made, the Japanese had not at the time the war ended reached a point where they were in a position to use these offensive projects could have been placed in operational use."

"There is no evidence that the enemy ever resorted to this means of warfare."

As to the Nazis' work with germ warfare, the report by Mr. Merck said:

"In December, 1942, the chief of strategic services reported to the joint chiefs-of-staff that there were some indications that the Germans might be planning to use biological warfare agents. While the evidence that the Germans might use such agents was inconclusive, there was considerable concrete information available from work which had been carried on in the United States, the United Kingdom and Canada that attack by biological warfare agents was feasible."

Successful in the sawmill industry and farming in British Columbia, many Sikhs like this veteran employ English Canadians. The Sikh colony was established in 1908. Some returned home, but many stayed.

CHICKEN PAPRIKA

1 1/2 pound young chicken
4 cups corn flakes
1 teaspoon salt
1 teaspoon pepper
1 egg
1 tablespoon water
4 tablespoons oil
1 cup water
1/2 cup milk
1 tablespoon paprika

Put chicken into serving pieces. Crush corn flakes into fine crumbs and mix with salt and pepper. Dip chicken in egg which has been slightly beaten with water, then in crumbs. Brown on all sides in hot fat. Add water, cover and simmer about one hour or until tender. Add top milk, sprinkle with paprika. Cover and cook over low heat about 15 minutes longer. Yield: Six servings.

SMALL POPULATION

Greenland is the least densely populated country in the world. In 1944 it had an average of only 0.6 person in a square mile, while the United States had an average of 45.5.

NOTICE

Although it is rumored that I bought a \$7,000 house in Elbow Park, Calgary, I wish to advise that I do not own a shack, house, or any land in Calgary on the Bowness Road, or any other road within the city limits.

I have an agreement of sale for land on the old Elton-Bergen mail road. Squatters were on this land in 1939, but soon vacated when the R.C.M.P. took action.

(Signed) LESTER INMAN

LONG YEARS AGO

February 12, 1904

Japanese torpedo boats attacked the Russian fleet at Port Arthur on February 9th, and as a result Russia has declared war on Japan.

The deal was closed Monday whereby Mr. O. F. Fries became the whole owner of the Clover Hill Creamery, purchasing the interest of Mr. W. A. Brodie, who will move to Carleton Place.

Mr. H.L. Reimer has purchased a steam plow and is now making contracts to break land for farmers. He says he will be able to break 20 acres a day with his new equipment.

The business section of Baltimore Ohio has been almost completely wiped out by fire, estimated damage being around \$200,000,000. The area of the fire is a mile and a half long, and four blocks wide.

February 11th, 1923

An Ontario buyer was through the Burnside district last week and purchased a number of homes. J.R. Miller, F. Kaufman, D. Shepherd and D. Edwards took in the Olds bungalow last week and came home with two firsts and a fourth, together with the Grand Challenge.

Royals and Kirby announce they have taken over the City Meat Market from Mr. H. Mohs. While coming into town last week with a load of hogs, Charlie Brown had the misfortune to overturn the load. There were nine pigs in the load, but with a little help Mr. Brown was soon re-loaded and came into town non-the-worse for his experience.

The Domestic Animals Act (Municipalities)

SALE AND REDEMPTION OF IMPOUNDED ANIMALS
(See 50, Domestic Animals Act, R.S.A. 1942)

Notice is hereby given under Section 50 of the Domestic Animals Act (Municipalities) that the following animals were impounded in the pound kept by William Novak, located on the S.W. 1/4, 24-31-45, on Monday the 21st day of January, A.D. 1946, and that the said animals were sold on the 1st day of February, 1946:

One light bay mare about three years of age, branded on left hip X and was sold to D. Broadhurst — 7
One brown mare about eight years of age, branded on left hip X and was sold to A. Luft, R.R. 1, Didsbury, Alberta. — 7
One dark bay gelding about two years old, branded on left hip X and was sold to A. Luft, R.R. 1, Didsbury, Alberta. — 7
One roan mare with bay filly sucking colt. The mare is aged with no visible brand, and was sold to A. Luft, R.R. 1, Didsbury, Alberta. — 7

And that said animals may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in the Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animals.

For information apply to the undersigned.

A. BRUSSO, Sec. Treas.
Municipal District of Mountain View No. 49.
Post Office, Didsbury, Alberta.

Notice of Municipal Meeting and NOMINATION OF CANDIDATES AT GENERAL ELECTION

Notice is hereby given that a meeting of the electors of the Municipal District of Mountain View No. 49 will be held in the Legion Hall, Didsbury, at one o'clock p.m. on Saturday, February 16, 1946, for the discussion of the affairs of the district.

And that from three o'clock p.m. to four o'clock p.m. on the same day, and at the same place, nominations for the office of councillor and hospital representative will be received.

Two Councillors and Three Hospital Representatives are to be elected. Councillors are to be elected for the following Electoral Divisions: Division No. 1; Division No. 3. Hospital Representatives are to be elected for the following Municipal Hospital Divisions:

For Olds Municipal Hospital— Division No. 1; Division No. 4. For Didsbury Municipal Hospital, Division No. 2.

Dated this 18th day of January, 1946.

FALLEN TIMBER NOTES

On Friday, February 1st the social evening of the community was held at the home of Mrs. Johnson. She was assisted by her grandson, Richard Wanamaker of Gull Lake, who is spending the winter months with his grand parents. Bingo and various games were played and a delicious luncheon was served after their homes with a hearty thank you for a happy time to their host and hostess.

Mrs. C. Montgomery has received word of the passing of her brother, Oliver, in a Lethbridge hospital. Neighbors in Fallen Timber extend to her their deepest sympathy.

Mr. Ernest Montgomery is at present in a convalescent home in Calgary, recovering from a foot injury he received while in the Air Force.

Mr. Kenneth Mullen is logging and sawing with great success on the Fallen Timber river. The boys are doing a big business, felling, skidding and sawing on the trees, and it is agreed by all that the success is due to Mr. Mullen's good nature, and Mrs. Mullen's good cooking.

Mr. Albert McMullen of Sylvan Lake and Mr. Donald McMullen of Red Deer, also Miss Bonar of Sedgewick, spent the week end with Mr. and Mrs. McMullen at their home in Fallen Timber.

Mrs. Fair was a week end visitor to Didsbury last week.

Miss Beth Mellon, who has been visiting friends in Edmonton, has returned to her home in Calgary.

One of our prominent citizens, Mr. Moncey, and some of our returned boys, Bob and Raymond McMillen, are logging for Mr. McGaffin.

IF YOU WANT GOOD ROADS IN ALBERTA

Get In Touch With
Your Representative
In the Alberta
Legislature Now!

The Alberta Government will soon be making appropriations for a highway program that has been prepared by the Department of Public Works, which provides for the building and bringing up to standard of Modern Tourist Highways, Main Highways, District Highways and Local Development Roads.

We have waited a long time for such a plan. It must not be allowed to be side-tracked now. Do your part by pressing your provincial government representative for action, and by urging your neighbors and any other organizations of which you are a member, to do likewise. Or, if you prefer, send a note to the Alberta Motor Association in Calgary, Edmonton, or Lethbridge.

DO THIS NOW! The government will give public opinion a hearing IF PUBLIC OPINION MAKES ITSELF HEARD. The A.M.A. is conducting a vigorous campaign, but it needs your support. Remember, good roads are in YOUR interest. DO YOUR part to get them. If you would also like to enjoy the services and privileges that go with A.M.A. membership, get particulars from your nearest branch. The fee is only \$10 a year.—Advt.

WEDDINGS
SHUPE—TAIT
Knox United Church, Calgary, was the setting for the marriage on January 26th at 4 o'clock in the afternoon of Blanche Mary Elizabeth daughter of Mr. and Mrs. Ralph Tait of Didsbury, to Mr. Stanley Isaac Shupe, son of Mr. and Mrs. Omer Shupe of Calgary. Rev. A.H. Hutcheon officiated.

Wearing a gown of white satin, styled with a fitted bodice and a sweetheart neckline, the bride was given in marriage by her father. Her three-quarter length veil was held in place by a satin Juliet cap, and she carried a bouquet of red rosebuds.

The bride's sister, Miss Norma Tait, was bridesmaid, and another sister, Jean Tait, was flower girl. Mr. Donald Shupe, attended, his brother as best man. Guests were ushered by the bridegroom's brother, Mr. Harold Shupe, and Mr. Ruey Tait, brother of the bride.

The parents of the bride and bridegroom assisted the bridal party in receiving the guests at a reception held at the York hotel. Mr. Cecil Milton gave a toast to the bride.

For her wedding trip to Great Falls, Montana, the bride wore a lime green dressmaker suit with brown accessories and a corsage of pink roses. Mr. and Mrs. Shupe will reside in Carleton Place.

Among the guests were: Mr. and Mrs. Cecil Milton, Mr. Jack Milton, and Mr. and Mrs. John Webb, of Blackie; Mr. Clayton Livergood of Lethbridge; Mr. and Mrs. William Wood and Mr. and Mrs. Harold Shupe, Carleton Place; Mr. Wayne Shupe and his son, Dennis, Harnett; Mr. and Mrs. Jess Hackett, and Mr. Harvey Tait, Turner Valley.

BREWING INDUSTRY OF ALBERTA

TRAINING ON THE JOB FOR WAR VETERANS

Employers in industry are being asked to provide openings in Alberta for veterans wishing to learn a trade or skill. Under the "training on the job" provision of Canada's rehabilitation program, employers place such veterans on the regular pay roll, but during their training period receive a pre-arranged subsidy from the government.

There are many occupations in modern industry for which no satisfactory training can be given in any pre-employment vocational school. Proficiency in these can be attained only through practical experience right on the job. An ever-increasing number of veterans are being placed for training in these industries and as the results become apparent employers are showing an increased willingness, and in some cases eagerness to co-operate in providing this type of training for veterans.

Canadian Vocational Training has a staff of the field men canvassing employers in shops, offices, factories and mills to locate training opportunities for ex-service personnel. Current reports from the Department of Labour show that the major industries requiring workers are textile and clothing, mining, lumbering, pulpwood and woodwork in the building and construction industry, bricklayers, plasterers and highly skilled carpenters are still in steady demand. Domestic workers and cooks are also urgently required.

The greatest surpluses of manpower by occupational groups are the professional and managerial, clerical and sales, metal and machine tool workers, automotive mechanics and drivers, electrical workers and unskilled light labour. Veterans' Affairs counsellors are keeping their eyes on the future and watching the employment situation locally as well as provincially, day by day. They are counselling veterans to take a long view with regard to their future careers. Meantime, employers can do much to help re-establish these ex-service men by offering them training on the job opportunities.

VAST COAL RESERVES IN NEW UNITED KINGDOM COAL AREA

A new coal area containing vast reserves of virgin coal has been opened up in Nottingham, England. The shaft which is to be sunk at a cost of about one and a half million pounds constitutes one of the most important of the recent developments in the United Kingdom coal mining industry. writes the Yorkshire Post. The plant when completed will include the most modern machinery in the world. It is estimated that the area contains 125,000,000 tons of proved coal. This means that on the basis of a million tons annual output work will be provided for some one thousand men for the next 125 years. The shaft is expected to be completed at the end of 1948.

WORLD HAPPENINGS
BRIEFLY TOLD

The quinquennial census of the prairie provinces will be taken this year, beginning in June.

In Hayward, Calif., Harold Sexton was arrested for overworking his cow. His pay was \$18 per week.

A number of houses at Broadstairs, England, were damaged severely by a blast when a sea mine exploded on the shore recently.

Britons who have a plane and a license were authorized to start flying again on Jan. 1. Many areas remain restricted, however.

Fourteen dozen yellow and white hyacinths were flown to England recently, the first flowers from the Channel Islands since 1938.

A use has been found for 30 life-size photographs of Hitler, seized at the German embassy. They'll be used to decorate dart boards in London.

A special award of the defence medal has been made by the King to the Duchess of Kent in recognition of her services as commandant of the Women's Royal Naval Service.

A royal prayer book, written in 1900 and sold for £1000 (\$4200) at Sotheby's auction rooms, London. It was once a gift from the King of Navarre to his daughters' governess.

Alberta's population has increased by nearly 1,000 during the past year, so nation book statistics indicate. The greater part of this increase is believed to be due to the return of discharged servicemen.

Strathclyde, Scotland, has no singing telegrams, but they are often sent across the river which separates the post office from this Inverness village. When flood conditions prevail the stream is impassable.

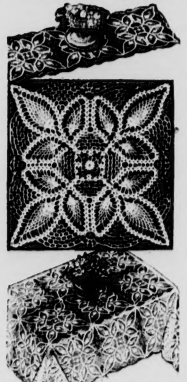

Poultry Pests

The Common Bedbug Is Often Troublesome To Poultry

Usually considered only a pest to man, the common bedbug and several other allied species are often troublesome to poultry. Only at night when a blood meal is required do the bugs search out their victims and at other times secrete themselves in cracks and crevices. Small, elongated white eggs are deposited in these hiding places, up to 200 eggs being laid by each female. The young bugs produced from these eggs are similar in appearance to the adults but are paler in colour, their only food like that of the adults being blood. They can live, however, for several months without a meal. The life-cycle from egg to adult may be completed within six weeks but is often much more prolonged.

One of the simplest and most satisfactory control measures for infested chicken houses is to spray all cracks and crevices in woodwork and roosts with creosote oil or crude petroleum. If complete eradication is not effected by this treatment, it should be repeated after about ten days.

Three For Scarf

7432

by Alice Brooks

Such relaxing needlework, this crocheted square, is easily used singly or paired. Only 20 make a 64 x 36-inch cloth in string.

These crocheted squares, 12 inches in No. 20 cotton, 16 inches in string, have many uses! Pattern 7432 has directions attached.

To obtain this pattern send twenty cents in coin or stamps cannot be accepted to: Hosiery Department, Winnipeg Newspaper Union, 175 McDermott Avenue E., Winnipeg, Man. Be sure to include your name, address and pattern number.

RADAR FOR WHALERS

Several British whaling expeditions are to be equipped with radar apparatus and means are to be provided for taking bearings on whales both on and below the water.

Conscience in what makes you tell your wife something before she tells you she does.

Maj. Allan Brooks at His Elbow

WORLD-FAMOUS ORNITHOLOGIST DIES IN R.C.—Major Allan Brooks, 79, D.S.O., famed the world over for his bird illustrations and well-known ornithologist, who recently died at his home in British Columbia. A student of birds all his life, he wrote many articles in leading ornithological journals in Canada, Britain and the United States.

Precision Engineering

Machines Developed In Britain For Warlike Purposes

Examples of the skill of British precision engineering which revolutionized war production and which will help to win the United Kingdom's peace production drive were on show for the first time in London. They were seen at the London Exhibition of the United Kingdom gauge and toolmakers.

The most striking feature of the exhibition is the number of entirely new machines developed for warlike purposes which can be turned straight over to peacetime production. For example, there is an air operated multiple gauge designed for the highspeed testing of cannon shells. The gauge enabled unskilled workers to test up to nine hundred shells hourly with dials registering errors of half a thousandth of an inch in each of the five directions.

The other example of wartime engineering achievements available for increased peacetime production is a can milling machine built by the Coventry Gauge and Tool Co. It turns out form millings in any desired shape to an accuracy of one millionth of an inch in any direction. Several types of gauges working to the limits of one millionth of an inch are exhibited. One of them records on a loud speaker when the dials are in position for accurate reading.

British precision industries' wartime achievement constitutes one of the most spectacular stories of the United Kingdom war record. Before the war the great of the peacetime instruments used by United Kingdom engineers came from overseas. When the war cut off supplies the precision industry, dependent by increasing its output to ten times its prewar volume.

The high quality of British engineering goods is due, to a considerable extent, to the equipment supplied by the precision tool manufacturers. But this equipment is also available for overseas and the London exhibition, by the way, by large numbers of precision engineers interested in purchasing the new peacetime machines.

Canadian Authors

A Drive To Establish A Fund To Assist Writers

A drive to obtain an adequate capital endowment for the assistance of outstanding Canadian authors who find themselves in pinched circumstances through age or infirmity is an objective of the Canadian Writers' Foundation.

The Foundation, organized in 1931, was incorporated last year. One of the originators and chairman of the present executive is Dr. P. H. Edgar of Toronto.

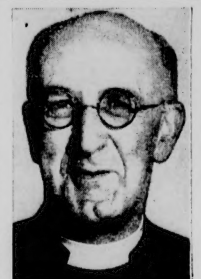

"In the lifetime of the literary artist, even the man of high genius, neglect and the poverty it engenders are the fate he not infrequently encounters," writes Wilfred Eggleston, literary secretary of the Foundation. "Fifty years ago, if a Canadian writer fell upon days of adversity when his productive years were over he was entirely at the mercy of such casual or desultory aid as might appear. Since then a national organization has been seeking modestly at first, more audaciously now, to grapple with the problem on a scale commensurate with the need."

At the time the Foundation was organized, the economic depression discouraged a public appeal, but from 1933 to 1943 a small annual appropriation was obtained from the Dominion government. At present there is no government assistance. For 10 years the chief beneficiary was Sir Charles G. D. Roberts, whose prose and poetry had done much to make Canadian literature known to the nation's people and abroad. Present beneficiaries include an outstanding poet who is just recovering from a two years' illness, and a novelist who for two years has been ill and unable to use his hands.

OIL WELLS IN BRITAIN

England now has 240 oil wells, producing about half a million barrels of crude oil a year. They were drilled during the war by an Oklahoma contractor for the British government.

Since 1696, there have been 21 major earthquakes in Japan, each of which has killed more than 1,000 people.

WILL VISIT CANADA IN AUTUMN

—Rev. Geoffrey Francis Fisher, Archbishop of Canterbury, will visit Canada and the United States next September. It has been announced. He has accepted an invitation from the primate of the Anglican Church of Canada to attend a general synod at Winnipeg, Sept. 4, and from the presiding bishop of the Protestant Episcopal church in the U.S. to attend a general convention at Philadelphia, Sept. 8. This will be the first time an Archbishop of Canterbury has visited Canada.

Seems Very Odd

But Industrial Accidents Often Happen Where People Seldom Go

In a memorandum issued to industry throughout Ontario, R. B. Morley, general manager of the Industrial Accident Prevention Association, comments on accident cases. He says one of the odd things about industrial accidents is the number of men and women who are injured in "the place nobody goes." He cites the case of a man caught on a revolving shaft while painting the ceiling of a plant. The argument against using a safety set screw was that nobody ever went up to the ceiling and consequently could not get caught. Warning industrialists to be doubly careful in "the place nobody goes," Mr. Morley says, "too many are hurt there in just the same way 'unloaded' guns have killed too many people."

COMFORT TEMPERATURE

The human body is so constructed that it functions best at temperatures of 60 to 70 degrees for those who wear civilized clothing and at somewhat higher temperatures for unclothed people.

LIFE'S LIKE THAT

By Fred Neher

"With the comic books he reads and the radio serials he listens to, you're simply wasting your time trying to frighten him with threats."

REG'LAR FELLERS—Heating Problem Solved

Health LEAGUE OF CANADA presents TOPICS OF VITAL INTEREST

PASTEURIZATION CAMPAIGN GAINS FURTHER SUPPORT

Support for the current campaign of the Health League of Canada which is aimed at obtaining compulsory pasteurization of milk through the nation came recently from two authoritative sources—the Dominion Council of Health and the Parliamentary Voluntary Committee on Health.

At present, Ontario is the only province with compulsory milk pasteurization legislation on its statutes. The Dominion Council of Health, at its annual meeting here, passed the following resolution:

"Be it resolved that the Dominion Council of Health . . . commend the campaign recently undertaken by the Health League of Canada to encourage the pasteurization of milk throughout Canada."

The Council membership includes the federal and provincial deputy ministers of health.

The Parliamentary Committee approved the following resolution:

"Resolved that this Voluntary Committee on Health of members of the Senate and House of Commons go on record as expressing the opinion that universal pasteurization of milk is in the interest of the Canadian people. That as this matter does not come within federal jurisdiction we express the hope that the provincial governments will again consider the possibility of enacting legislation to enforce pasteurization."

A Favored Country

Canadians Should Realize What They Have To Be Thankful For

A St. Marys resident was heard to say on the radio after the New Year holiday that he was literally fed-up on too much turkey, dressing, plum pudding and mince pies and that he would be glad when the last of the four was eaten up and the ordinary not-so-very fare was substituted. There are not many in this district who fared less well, as all kinds of food and other good things were in abundance here and some families had as many as four turkeys to spread over the two holiday periods. To those who have just come home from Europe, it was a great time of feasting, of good cheer and good fellowship, but in the back of one's mind there has always been the thought that countless thousands across the Atlantic were having less to eat than even in the days of desolation after the Second World War. There are a lot of things Canadians can be thankful for but probably the greatest is this wealth of food and food which we enjoy, even with the rationing restrictions in force—St. Marys Journal-Argus.

WHAT OIL FIELDS ARE

Oil fields of the world actually are graveyards of animals and plants which have been subjected to millions of years of heat and pressure beneath the earth's surface.

Weekly Ration Fashion for a family of four

SUN.	MON.	TUES.	WED.	THU.	FRI.	SAT.
Roast Lamb	Curry of Lamb	Vegetable Scallop	Beef, steak & Kidney Pie	Frankfurters	Fish Dish	Stuffed Flank Steak
Group B	left-over roast	unrationed	Group B	Group E	unrationed	Group B
3 lbs.			3/4 lb. beef round (kidney unrationed)	1 lb.		1 1/4 lbs.
2 coupons			4 tokens	3 tokens		1 coupon
1 token for 6 ounces of cooked meats						

The family's penchant for a Sunday roast could be pleasantly met by a three pound rolled shoulder of lamb.

A tempting remake for Monday would be a tasty lamb curry. Aside from this, you may have some useful odds and ends for luncheon use. A vegetable-egg scallop can appeasingly and satisfactorily solve the problem of a meatless meal for Tuesday. Just alternate layers of the family's favored vegetables, hard cooked eggs, and flavoured cheese sauce, top with buttered breadcrumbs and oven heat until bubbling and browned. Good companions for it would be hot scones and a crisp cabbage salad. Steak and kidney pie on Wednesday is an excellent dish to lastfully and nutritiously satisfy winter appetites. For Thursday, plump frankfurters, along with sauerkraut and jacket boiled potatoes, are suggested for appealing thrift. And on Friday unrationed fish, done to your liking, will bring the goodness of the sea to your table. A flank steak encircling a savoury dressing will take care of Saturday's dinner. It should leave you with a comforting something to tuck away in the ice box. You may care to devote the remaining token of the week to 6 ounces of cooked meats for luncheon menus, or to augment the cold sliced flank steak for Sunday supper.

Train Pipers

Poles Were Taught To Play The Bagpipes

The Pibroch Society of Scotland helped train 55 Canadian army pipers during the war, in courses given at Edinburgh Castle.

Pipe Major William Ross, M.B.E., noted Scottish bagpiper, instructed 713 pipers from British Dominions and even Polish forces during the last six years.

Canadians who attended more than one course on the finer points of pibroch, included Pipe Majors Eason, Vancouver; Neil Sutherland and Malcolm MacKinnon, Calgary and Sgt. Armstrong, all of the Seaforth Highlanders of Canada; Pipe Major D. Sutherland, Canadian Black Watch; Pipe Major Duncan and Scott, Cameron Highlanders of Ottawa and Pipe Major Noble, Argyll and Sutherland Highlanders of Canada.

There are more than 150 species of trees in Canada.

Something Universal

Back Seat Driver Is Not Peculiar To Any Country

Sometimes it seems that the Russian people are as remote from our understanding as they are from our sight. For example, it must have seemed odd, if admirable, to many Canadians that a Russian husband and wife should have bought a tank with their own money, operated it in Poland, Czechoslovakia and Germany, and killed 160 enemy soldiers.

But if the Canadians read to the end of the story, they would have found that the husband did the driving and the wife did the bossing. The backseat driver, then, is a Russian institution too. Knowing that, we somehow feel that world brotherhood is a possibility after all.—Kitchener Record.

PLANNED REFORMS IN ASIA

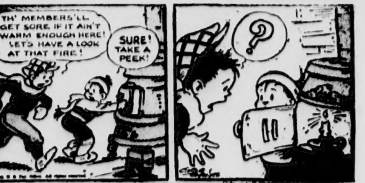

The British took the island of Cyprus from Turkey in 1878 as part of a plan for the introduction of reforms in Asia Minor.

OUR COMPLETE SHORT STORY—

HUNTER'S MOON

— BY —
DON CAMERON SHAFER

THE CHICAGO SUN SYNDICATE

THREE long and vaulting years waited for this day. Since he was home again. Home to his beloved mountains.

This was the day of days—the first day of deer hunting. Since he was fourteen, when grandfather gave him his first rifle, Loren had hunted deer. Not until he enlisted, he never missed an opening day.

The fact that this, perhaps, would be a different kind of deer hunting did not entirely spoil his day. Since Loren there would be no still hunting, at least not for a long time, no trailing of wily bucks, miles and miles over the hardwood ridges, through dense spruce stands, hoping to outwit a crafty animal for a successful shot. Loren's left leg was still weak and the foot dragged a little, but he considered himself lucky, after the mortar shell burst almost in his face, to have a leg at all, and thanks to the medicals for that. It would be quite impossible to stalk and trail a smart old buck with one weak leg and a dragging foot. But, if he could get one, the meat would be more than welcome at his home down in the valley.

The bright leaves came floating down. Though Loren walked slowly, and with a noticeable limp, his worn shoe-pads made no noise in the old lumber road. Dark eyes studied the trail sign and sharp ears were alert to every forest sound. Mark of a spring fawn's little feet beside the slender hoof prints of the mother deer. The rounded deep impressions where a heavy buck had passed.

At Wolf Rock, Loren left the old log road and made his way slowly and carefully to the top of Windy Ridge, connecting Old Mountain with Old Tobie, where he knew of a natural deer crossing. This was a likely place to intercept a buck disturbed by drivers on the opposite ridge and seeking safety in the rocky heights above. In the distance he heard a rifle shot, another and another.

"One shot meat," repeating the old saying to himself, with a grin. "Two shots meat, three shots salt pork for supper."

At the top of the ridge he selected a convenient rock, where he could stretch out his aching leg and rest.

Stop Baby's Sniffles

his back against a tree. The warm October sun filtered down through the lacy pattern of interlaced branches overhead. High against the blue a red-tail hawk swung in tireless circles. A quill rustling little red capped birds twittered their happy way southward through the treetops. A tiny weasel, changing from summer brown to winter white, raced in and out of rock crevices hunting deer-mice. Then, far down the slope, a shadow moved. Watching closely, Loren saw that it was a big buck, and coming his way. Ordinarily this buck would have been bedded down for the day. Evidently it had been aroused by hunters and knew that it was being hunted.

THE buck came slowly up the wooded slope, antler head swinging low, stepping carefully to make no noise, taking full advantage of the cover. Loren knew that a buck runs only as a last resort, with long legs and specially developed muscles to carry it bounding over twelve foot obstructions, leaping thirty and more feet at a bound. Every few careful steps the buck stopped and when motionless was quite invisible in its protective fall coloring. But Loren could see the big ears turning this way and that, to catch every sound vibration, and he remembered old hunters insist that bucks have special hearing devices in their legs to register the slightest earth tremor.

As the buck came nearer, Loren could see that it had been wounded. From time to time it turned to look a bleeding cut high on the left quarter. It fairly crawled up a slanting ravine, ducking under a wind-fall it easily could have jumped over, but that would be too conspicuous.

Nearing the top of the ridge the buck "froze", breathing deep—evidently a lot of man scent warned it of danger ahead. A few slow and cautious steps and it laid down in a small hollow, with only the antler head on long neck raised to watch, polished horns looking like a bit of dead brush. Then Loren saw the hunter coming up the slope, a heavy man in red mackinaw coat, noisily crushing dry leaves, watching the woods ahead, automatic rifle ready, but paying no attention to the faint trail. The red coat passed within a few yards of the hidden buck, never suspecting it was there, and disappeared down the hill.

Loren was so engrossed watching these safety precautions of the hunted that he almost forgot that he was the hunter, with a loaded rifle across his knees. Now, at the point blank range, he remembered the gun. Waiting until the hunter's head was turned, he raised the rifle quickly. In that instant, as his eye sought the rifle sights, there flashed through his mind the memory of another hunt.

He saw a wounded Yank, helmet and rifle gone, in torn GI uniform, splashing through the mud and water of a rice paddy, in a hail of bullets, falling and rising again and again. Excited Japs splashing after him, screaming, shooting, racing from all sides to head him off, to kill him. The hunted man ran limping down a hedge row, threw himself into an irrigation ditch, along which he crawled with speed, to gain a maize field.

From field to field they hurried him, beating up the cover, showering every movement with bullets. Exhausted, hurt, the hunted man laid hidden when he dared, sinking away again when the policy hunt became too close, using all his craft and cunning learned from wily bucks he had hunted, not always successfully. He doubled back, where they would be least likely to look for him, and he unobscured into the muddy water of the rice paddy. Submerging all but his face he covered this with a handful of water, and there he hid until darkness and the hunt was over for the day.

THE picture faded away—the rifle came slowly down. "I don't believe I ever will hunt again," he said aloud. The surprised buck bounded away. Loren got up, rubbed circulation back into his aching leg, and started homeward.

Answer Was Surprising

Author Found Out What Josef Stalin Likes And Dislikes

When Boris Pasternak, author of "Doctor Zhivago" and traveler, met Josef Stalin some years ago before the war, he asked him "what he liked best in life—outdoors, the terrific work which had first inspired him."

He considered the matter, and said: "Dogs, children, my own people, writers in Georgia among whom I was raised."

"And what do you dislike most?" pursued Miss Pasternak.

"The answer," she says, "was surprising and directed in an unusual rapid manner to his wife: was accompanied by a look which he held in her hand the young woman translated, laughing. 'He says, large mountainous females full of words.'"

PIT TO NEW USE

A factory which turned out poison gas at Cape Town for the use of South Africa's army forces in the event of an emergency, is to be converted for the production of the insecticide DDT. The powder will be used to fight disease, pests and plagues in the Union.

RUST LABORATORY

Plant Located At Winnipeg Is Doing Good Work

The Dominion Laboratory of Plant Pathology at Winnipeg is a laboratory known as the Rust Research Laboratory—the centre for investigations on rusts, smut, and bacterial diseases of cereals and flax rust. It is responsible for certain investigations on root rots of cereals and for the seed-borne disease examination of foundation, elite, and registered cereal seed samples originating in Manitoba, Ontario, Quebec, and the Maritime Provinces. Attention is given to some of the other diseases of cereals and flax, and to vegetable diseases that are locally of economic importance.

Laboratory and greenhouse accommodation is provided in the Winnipeg Laboratory for the Dominion Cereal Breeding Laboratory (Cereal Division, Experimental Farms Service), and extensive co-operative work in the production of disease-resistant varieties of wheat and oats is carried on by the staffs of the two Laboratories. Similar co-operation, although necessarily less extensive, is afforded the Cereal Division, Ottawa, and the Dominion Experimental Farms, and provincial Universities in Western Canada in respect of the testing for disease resistance in new productions of cereals and flax.

THE ONE QUALIFICATION

Elsa Maxwell, New York's famous party woman, offers a lady as "a woman who has as much common sense for others as for herself." There's a lot of women who will have to change their habits and customs before they can measure up to that definition.

MACDONALD BRIER CURLING

HON. THANE A. CAMPBELL, Charlottetown, P.E.I.

Renewing of this famous competition which was cancelled in 1942 to comply with Government requests for restricted travelling, means activity all along the line for curlers right back to the rinks who play outside or under all sorts of improvised cover.

Wherever you curl it is all good fun, with fine sporting associates. You can use jam pails filled with sand; moulded concrete blocks; even blocks of wood instead of regulation stones and have a whale of a time.

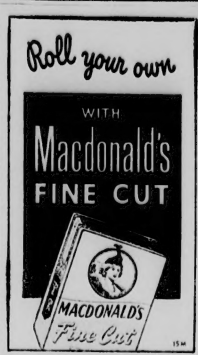

And many a rink trained under these conditions make the big city men go all out to beat them when they meet under ideal conditions, because there is no advantage over a keen eye or strong arm and good judgment, no matter how developed.

Alberta, Saskatchewan and Manitoba all stage big annual competitions, but the most famous and greatest of the nation is the one staged each year in Winnipeg, curling capital of the nation. The Manitoba Brier lasts for 12 days, and draws 1,500 curlers from all parts of Canada and the United States.

Major factors in the steady growth of curling, in addition to improvements in curling technique, have been well-organized and smoothly functioning provincial and Dominion associations which have done much to standardize the game and foster top-flight competition.

While sectional and provincial competitions have long been in vogue, it is only since 1927 that playdowns have been held to determine the Canadian single rink champions. Competent observers state that interest has trebled since inception of the Dominion-wide struggle for supremacy, which has as its goal the MacDonald's Brier Tankard.

The idea for the Canadian playdowns stemmed from the eastern division of two Winnipeg rinks in 1925 and 1926, skipped by Canny Howard Wood and George Sherwood, respectively. The winners displayed a style which had every eastern curler

Cosmic Rays

May Develop More Energy Than Splitting The Atom

A much greater amount of energy than is produced by splitting of the uranium atom may develop from use of cosmic rays. Chancellor Arthur H. Compton of Washington University said, "Processes have appeared in our study of cosmic rays which transform all of the mass of particle into energy." Dr. Compton told the St. Louis academy of science. Dr. Compton is one of the scientists who developed the atomic bomb.

MACDONALD BRIER CURLING

SENATOR JOHN T. HAIG, K.C., Winnipeg, Man.

Picture here is the MacDonald Brier Tankard and Trustees for this emblem of the Canadian single rink curling Championship. Chairman Thomas Rennie of Toronto, and Senator John T. Haig, Winnipeg, are original board members. Hon. Thane A. Campbell, P.E.I., replaces the late Col. Peter D. Lyall, Montreal. Canceled late in 1942 to comply with Government requests for reduced wartime travel, the Brier playdowns will be resumed in Saskatoon March 4 to 7, 1946.

Through the years, changing conditions have brought about variations in the rules governing the competition. Play for the Tankard is controlled by a board of trustees. The chairman is silver-haired Thomas Rennie of Toronto, prominent in Canadian sports circles for many years. Other members are Senator John T. Haig of Winnipeg and Hon. Thane A. Campbell, chief justice of the supreme court of P.E.I. Rennie and Senator Haig are original board members, but Chief Justice Campbell replaced Col. Peter D. Lyall of Montreal, who died more than a year ago.

The last major change in the rules governing play in the Brier occurred in 1936, when British Columbia and Prince Edward Island were brought into the fold. Thus, for the first time, all provinces, with the addition of Northern Ontario, were represented.

Brier competition has since been conducted on this basis. Today, all provinces through their own associations, conduct competitive play. With one exception, play

BATTLEFORD MUSEUM

Will Restore Historic Portion Of Old Police Post

Construction of a Royal Canadian Mounted Police memorial and Indian museum at Battleford, Sask., is making good progress, according to a progress report issued by Natural Resources Minister J. L. Phelps, honorary president of the committee in charge of the work.

Several buildings on the property have been dismantled and the lumber sold. This revenue will help in restoring the historic portions of the old police post as it existed 75 years ago.

The Commanding Officer's house is nearing completion and with the renovated buildings will serve as the principal home for the police memorial and Indian museum. The historic detention barracks and police barns will be moved within a more convenient radius and a stockade of rustic cedar will be built to accurately reproduce the police post.

In addition to the renovation work, the surrounding grounds will be beautified and the Saskatchewan government has undertaken to make more land available for a community park. Persons who like to donate Indian relics and other historical items to the museum should communicate with Campbell Innes, M.A., North Battleford.

AIR SEA RESCUE SERVICE

During the European war the Air Sea rescue service saved 5,721 aircrew personnel in waters around the United Kingdom. 32,000 aircrew in overseas waters and 4,667 sailors, soldiers and civilians in areas other than the seas around Britain.

Vicks VapoRub
Penetrates the chest and back, relieves colds, coughs, croup, whooping cough, and all other respiratory ailments.
Stimulates the chest and back, relieves colds, coughs, croup, whooping cough, and all other respiratory ailments.
Warming, soothing relief—grand relief—comes when you rub good old Vicks VapoRub on the throat, chest and back at bedtime. Its penetrating stimulating action keeps on working for hours. Invigorates restful sleep. And often by morning most misery of the cold is gone. No wonder most mothers use VapoRub. Try it tonight—home-proved.

They All Came Back

Another Surprising Case Of The Lucky Thirteen

Culled from an English newspaper is this strange but authentic story of a little village in Somerset named Woolley.

From this tiny hamlet in the lovely countryside north Bath, 13 young men went overseas to fight in the First Great War. And when it was all over they all came back.

Twenty-two years passed, and 13 more lads from Woolley went forth to serve their country in the Second World War. A memorable celebration has just been observed by the village to mark the remarkable fact that these 13 men have also returned home safe and sound—Halifax Herald.

Wide Size Range

By ANNE ADAMS

Want a becoming frock that slips on in a jiffy? Pattern 4866 has quick buttoned front, ruffles on collar and sleeves for all-day freshness! See wide size range!

Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

DINED WITH HATS ON

In the time of Louis XIV of France, it was proper etiquette to tip your hat at the table. Noblemen dined with their hats on, doffing them politely when passing the meat or spearing a piece of bread.

SLOAN'S LINIMENT

Do YOU suffer from CRAMPS NERVOUS TENSION

On "CERTAIN DAYS" of the month? If female constitutional monthly disturbances make you suffer from cramps, headache, backache, nervousness, irritability, dizziness, etc., Sloan's Liniment is the only remedy that relieves such symptoms. Sloan's Liniment is a powerful, yet gentle, remedy that relieves such symptoms. Sloan's Liniment is a powerful, yet gentle, remedy that relieves such symptoms. Sloan's Liniment is a powerful, yet gentle, remedy that relieves such symptoms.

MOURNERS FAMILY

IMPROVE BACON

MAINTAIN SUPPLY

Maintenance of supply and improvement of quality of bacon shipped to the United Kingdom during 1946 will have an important effect upon Canada's ability to retain a satisfactory share of the British market, says the Current Report of Agricultural conditions in Canada. During the war years, a hard cure for bacon was necessary for preservation under difficult conditions of transportation and storage in the United Kingdom. Improvement in these conditions has made possible the use of a milder cure. Further modifications in cure are planned which, along with continued improvement in the quality of bacon produced, will ensure Canada's ability to compete successfully with the product of any other country.

Canadian farmers have been asked to maintain production close to six million hogs in 1946. This is the minimum number which would make possible the fulfilling of the 1946 contract with the United Kingdom for 450 million pounds of bacon, and at the same time provide supplies in a rationed domestic market at a level which would prevent the development of a tendency to divert marketings into irregular channels.

Arden Dendrick and Walter McInnes spent Tuesday in Calgary.

Mrs. W.F. Barnett and son Wayne left Monday for Salmon, Idaho where she expects to meet her husband, Sgt. W.F. Barnett who is on his way home from Japan where he has been with the occupational forces in the U.S. Army. Mrs. Barnett has been engaged at the Didsbury Hospital as nurse for the past year and has been staying with her parents, Mr. and Mrs. H. Gabel.

Complimenting Miss Edith Pratt, whose wedding takes place on February 14th, Mrs. Merrill Hummel served the guests. The next evening at a miscellaneous shower at the former's home on Friday evening, Mrs. Elton Himmelreich assisted the hostesses in serving. Valentines decorated the table. Many useful and lovely gifts were received by the bride-to-be.

The Women's Missionary Society of Knox United Church held their first tea of the year at the home of the president, Mrs. Ruth Eckel, January 30th. Forty ladies called during the afternoon. Mrs. Norman Clarke served tea and the Misses Fern Enecher and Betty Bowman served the guests. The next evening of the W.M.S. will be held at the home of Mrs. Roy McArthur, Sunday evening, February 18th. All the ladies are welcome.

NEWS FROM THE WEST

Mrs. O. Thompson has been spending the week-end in Brooks where her brother and wife have been celebrating their 25th wedding anniversary.

Mrs. C. Reed, Sr. is in Calgary for medical treatment.

Friends gathered at the home of Mr. and Mrs. C. Byrt to celebrate LAC and Mrs. John Towle (nee Laura Russell) who were married just before John went overseas about 18 months ago, and who recently returned. Cards were played and lunch served, and a good time had by all.

Mrs. D. Evans was able to leave the Holy Cross hospital last Thursday and spent a few days visiting Mr. and Mrs. Pitt in Calgary, parents of Mrs. Glen Evans, returning home Monday.

LAC Cpl. Hong was fortunate to get off with a shaking up when the train he was travelling on across Holland was in a head on collision with another train, six being killed and 14 injured.

Mr. and Mrs. M. Campbell Jr. were Calgary visitors one day last week. Messrs. M. Evans and L. Evans were also in town.

We are glad to hear that Mr. J. Hosenood is improving after being confined to bed for several days, the result of a fall.

We were glad to hear via the radio where our singer is going these days. We just aren't getting it. As we understand it we are to get 125¢. That's another new person, instead of 10 pounds, and here we thought there was a hole in the bottom of our sock. At least it is not 125¢. That's another new person, instead of 10 pounds, and here we thought there was a hole in the bottom of our sock. At least it is not 125¢.

On Sunday, February 17th, the theme will be "The Eyes of a Young Man Overseas". Sunday school will be held at 11:30 a.m. The senior service will be held at 7:45 a.m. and the subject of the message will be "The Unpardonable Sin". Bethel Sunday school will be held at 2 p.m. and church service at 3 p.m.

DIDSBURY HOSPITAL BIRTHS

Born to Mr. and Mrs. Floyd Alder on Wednesday, February 6, a son.

To Mr. and Mrs. H.J. Penner on Thursday, February 7, a daughter.

PLEASE PHONE OR BRING IN YOUR NEWS ITEMS

This newspaper cannot make a house to house canvass for news, but it is always glad to have it "shoehorned or hunked in." We want all the news. We are just as pleased to mention your guests or your visit as to mention dolours of your relatives—but maybe your neighbors cooperated with us in getting the facts. Please let us have your news items. Our columns are always open to them. And remember they must be in before Tuesday noon. If at all possible, and not later than 5 p.m. Tuesday, to ensure publication in that week's issue.
